

To Whom It May Concern:

I wish to register my utmost concern over the proposed Low Power FM implementation and how it may adversely impact pre-existing FM broadcasts.

Specifically, I am concerned about how it may displace current service of KLOVE: Cincinnati WNLN 104.3, Dayton WOKL 96.9, and Wilmington WGLN 102.3. I personally listen to these daily as well as many thousands of others on these and affiliate stations.

Their programming serves many local communities with wholesome, family friendly entertainment, information and encouragement. It would be a tragic loss if our community were to lose such programming. Please do not displace valuable radio programming such as this with LPFM.

Sincerely,
Steven R. Conover, M. D.
